Start here if you have a skillet

Page 3 - Breakfast Quesadilla

Eggs, vegetables and melted cheese

Page 4 - Quinoa Breakfast Bowl

A small batch for your MiniMo pot

Page 5 - Coffee Oatmeal

For coffee lovers with a MiniMo-compatible press

Before you turn on the stove

- Cook outdoors on a flat, stable surface. Never use the stove inside a tent, vehicle or building.

- Light the burner without a pot or skillet on it. Then place the cookware as directed in the MiniMo manual. Use the Pot Support for the skillet.

- Never fill the MiniMo pot more than half full. Stay with the stove, stir food frequently, and turn it off when finished.

- Keep eggs and other perishable food at 40 F or colder. Discard it after more than 2 hours without cold storage, or 1 hour when the temperature is above 90 F.

Kitchen shorthand: tablespoon is the large measuring spoon; teaspoon is the small one. A simmer means gentle bubbling.

These are simplified MiniMo cooking directions, adapted from the preserved Jetboil recipes. Changes are noted on each card. This is a starter guide, not the full cookbook. Sources and review limits are on page 6.

French Toast

Makes 3 slices

Equipment: MiniMo burner, Pot Support, Summit Skillet, spatula, bowl, fork, measuring spoon and food thermometer.

Gather these ingredients

- 3 eggs
- 3 drops vanilla
- 2 tablespoons butter
- 3 slices bread
- Maple syrup, powdered sugar and cinnamon for serving

Cook it

1. With the stove off, beat the eggs and vanilla together in a bowl.

2. Set up the burner and Pot Support as directed in the stove manual. Light the burner with the skillet OFF the burner, then place the skillet on the support.

3. Melt the butter in the skillet. Use gentle heat so it does not burn.

4. Dip a slice of bread into the egg mixture, coating both sides. Place it in the skillet. Cook in batches if the slices do not fit flat.

5. Turn with a spatula and cook the other side. The bread should be golden and the egg coating cooked through. Check for 160 F in the egg-containing portion.

6. Turn the stove off. Serve with syrup, powdered sugar and cinnamon.

MiniMo note: Keep the eggs cold until cooking. Gentle heat and cooking in batches are practical MiniMo suggestions, not measured cooking times.

What was adapted: Ingredient quantities retained. Directions simplified; safe lighting order and egg-doneness guidance added.

Breakfast Quesadilla

Makes 1 folded tortilla

Equipment: MiniMo burner, Pot Support, Summit Skillet, spatula, knife, cutting board, measuring spoons and food thermometer.

Gather these ingredients

- 2 tablespoons diced bell pepper
- 2 tablespoons diced tomato
- 1 to 2 tablespoons diced onion
- 1 tablespoon olive oil
- 1 teaspoon butter
- 2 eggs
- 1 tortilla
- 1 to 2 ounces mozzarella or cheddar cheese, shredded

Cook it

1. Dice the vegetables before lighting the stove. Keep the eggs cold until needed.

2. Fit the Pot Support according to the manual. Light the burner with the skillet OFF, then place the skillet on the support.

3. Add the olive oil and vegetables. Cook for about 2 to 3 minutes, then move the vegetables to a plate.

4. Melt the butter in the skillet. Crack in the two eggs, immediately place the tortilla over them, and press gently with the spatula.

5. Cook for a couple of minutes, until you can slide the spatula underneath. Flip the tortilla and eggs together.

6. Add cheese and the cooked vegetables. Fold in half and cook over low heat until the cheese melts and the egg is cooked through to 160 F. Turn the stove off and serve.

MiniMo note: Use one tortilla, folded in half. The original recipe also offers an optional steaming finish; this starter card uses its basic low-heat finish.

What was adapted: Based on Jetboil's Bobsadilla. Quantities retained; directions simplified and manual lighting order added.

Quinoa Breakfast Bowl

Half of the published recipe; portion size is not specified

Equipment: MiniMo with its cooking pot and lid, spoon, measuring cup and tablespoon.

Gather these ingredients

- 1/2 cup water
- 1/4 cup quinoa
- 1/4 cup unsweetened coconut milk
- 1/2 handful dried fruit
- 1 tablespoon pumpkin seeds
- 1/2 handful coconut chips
- 1 tablespoon honey

Cook it

1. With the pot OFF the burner, add the water and quinoa. Remove the pot's bottom cover. Light the burner, then attach the pot as directed in the manual.

2. Bring to a boil. Turn the heat down until the mixture bubbles gently; this is a simmer.

3. Put the lid on and simmer for about 15 minutes. Stay with it, stirring frequently. Reduce the heat if it threatens to boil over. Check that the quinoa is tender; the smaller batch has not been field-tested.

4. Turn the burner off. Stir in coconut milk, dried fruit, pumpkin seeds, coconut chips and honey.

5. If the toppings would put the contents above half full, place the toppings in a separate bowl and add the cooked quinoa to that bowl instead. Serve.

MiniMo note: Never fill the MiniMo pot more than half full. This applies to the combined food and liquid, not just the water. The handful measures are deliberately approximate because the original uses handfuls.

What was adapted: Every ingredient is halved for a smaller batch. Toppings are mixed off heat. This adaptation has not been field-tested; the full original remains unchanged.

Coffee Oatmeal

Uses 1 oatmeal package; allow two separate 5-minute waits

Equipment: MiniMo pot, Grande Coffee Press confirmed to fit your MiniMo, spoon, measuring cup and spoons.

Gather these ingredients

- 1 package Good To-Go oatmeal
- 1 1/4 cups water
- 3 tablespoons ground coffee
- 1 tablespoon chopped chocolate-covered espresso beans
- 1 tablespoon granola
- 1 teaspoon cacao nibs
- 1/2 teaspoon flax seeds

Cook it

1. Before your trip, chop the chocolate-covered espresso beans. Pack them together with the granola, cacao nibs and flax seeds.

2. Put the measured water in the pot while it is OFF the burner. Remove the bottom cover. Light the burner, attach the pot according to the manual, and boil the water.

3. Turn the burner off. Stir in the coffee. Fit the compatible press according to its instructions, but do not press it down yet. Wait 5 minutes.

4. While waiting, open the oatmeal package and REMOVE the oxygen absorber. It is not food.

5. Gently lower the press to trap the grounds. Pour the coffee into the oatmeal package, stir, and wait another 5 minutes.

6. Stir in the topping mixture and eat.

MiniMo note: The original names smaller Jetboil systems and their regular press. MiniMo needs the compatible Grande press. If you do not have that press, choose another recipe in this guide.

What was adapted: Based on Caffeinated Oatmeal Blast. Quantities and both waits retained; MiniMo press, burner-off brewing and clear lighting order added.

About this guide

The cooking pages are intentionally simple.

The original Jetboil ingredient lists and instructions are preserved separately in your cookbook. This guide provides practical directions, with equipment and cooking notes added outside those originals.

Review limits

Recipe text was checked against indexed copies of the official Jetboil pages on September 10, 2026. Jetboil blocked direct website access during that check. A fresh live-page comparison is still pending.

These editorial adaptations have not been field-tested. No exact serving count, fuel use or total preparation time is promised. Quinoa quantities are exactly half the published amounts; the original simmer time is a starting point, not a tested time for the smaller batch.

Your first meal

If you have the Summit Skillet and Pot Support, start with French Toast on page 2. If you are using only the MiniMo pot, choose Quinoa Breakfast Bowl on page 4. You do not need to open any of the technical files to cook from this guide.

Starter edition - September 10, 2026
